## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Atkins et al '507. Atkins et al '507 discloses a plurality of plates 236 connected to a rear portion of the work lamp (as broadly claimed since applicant hasn't established in the claim which direction "rear" is in relationship to the other claimed elements, the work lamp of Atkins et al '507 meets this limitation since the grid 230 of Atkins et al can be a rear portion in relationship to a wall in a room or other object. The work lamp and a grid body 230 is connected to the plates.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin. Lin discloses a plurality of plates 6 connected to a rear portion of the work lamp (as broadly

claimed since applicant hasn't established in the claim which direction "rear" is, the work lamp of Lin meets this limitation since the grid 7 of Lin is in a rear portion in relationship to a floor. Furthermore, the lamp of Lin is a "work lamp" because the recitation "work lamp" is intended use and the lamp of Lin is capable of being used as a work lamp. The lamp of Lin also has a grid body 7 connected to the plates 6.

Regarding claim 5, the grid body includes a plurality of grid rods 71 connected at opposing ends thereof to the plurality of plates 6.

Regarding claim 6, the plurality of grid rods are arranged in a pattern selected from a group consisting of parallel rods located in a vertical direction, parallel rods located in a horizontal direction, crossing rods located in horizontal and vertical directions, and crossing rods located in non-horizontal and non-vertical directions.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 4-6 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
